

Recently launched, the 161 ft. (49m) M/Y LADY MICHELLE tri-deck with an aluminum and superstructure.

TRINITY YACHTS

WORLD CLASS BUILDER OF MEGA LUXURY YACHTS

Trinity Yachts, has set several benchmarks over the past few years. In 2005 Trinity delivered the 180ft. (55m) M/Y MIA ELISE (now the M/Y MUSTIQUE), and she was at the time the largest full displacement superyacht built in the USA in over 60 years. A second benchmark was reached with the delivery of the 161ft. (49m) M/Y ZOOM ZOOM ZOOM, the fastest conventionally powered superyacht using Caterpillars new 3516B-HD engines (also another first for the superyacht industry) and attaining a top speed of 26 knots under trial load.

In 2007 Trinity set another first by having the most superyachts under construction the US industry has ever witnessed, with an unprecedented line up of 20 beautiful superyachts (approximately 3,419 linear ft./1,042m).

Trinity is continuing to raise the bar with a recent announcement of a new 196ft. (60m) steel hull with an exquisite interior designed by the world renowned Bannenberg Designs and executed by Metrica of Germany, reasserting that a US. built superyacht with European taste and design is easily attainable here in America.

Trinity's reputation of building a first class seaworthy ship always focuses on a high level of technology yet they

have never faltered on their attention to detail and fine craftsmanship that simply culminates in a world class luxurious superyacht. With a ship building legacy and experience that dates back to WWII, there is little wonder why Trinity is the largest superyacht builder in the USA.
