

Trinity Yachts

Last year saw U.S. builder Trinity Yachts go from strength to strength with significant deliveries of its 162-foot *Lady Michelle*, 161-foot *Imagine*, 161-foot *Lohengrin*, and 164-foot *Mine Games*. Trinity also completed the new construction of its administration office building, put into service the new 500-ton ASCOM Travelift, and began the installation of its new 3,700-ton Syncro Lift. With over 90 acres of build space, of which 22 acres are under cover between the two yards, Trinity has doubled in size during the last three years and the average length of the yachts it produces is approximately 175 feet based upon its order book.

This year looks to be another exciting one for Trinity Yachts, the largest custom luxury superyacht builder in the United States. Trinity is proud to look to the deliveries of six upcoming superyachts ranging in size from 122 feet to 191 feet. These are the 161-foot *Destination FoxHarb'r Too*, the 161-foot *Anjilis*, the 191-foot *Unbrid led*, the 142-foot *Big City*, the 164-foot *Norwegian Queen II*, and the 122-foot sportfisherman, *Mary P*.

In a world where most yachts are constructed on a semi-production basis, Trinity offers the ability to design and build custom yachts in any size up to 360 feet featuring beautifully finished interiors with the finest materials available, such as exquisite bookmatched inlaid marble, hand-selected hardwoods and veneers that are beautifully matched and finished, stately raised paneling with burlled accents and fine fabrics from around the world. Trinity works with the world's most renowned naval architects and interior designers and is pleased to quote on a design that has been produced for you independently. It is for this reason why nearly 50 percent of its yachts currently on order are from repeat clients.
